Fleet optimization

## Start your journey to fleet efficiency and cost-savings.

Use data-driven insights to optimize every aspect of your fleet.

+ Reduce engine damage
+ Detect battery drain
+ Identify and combat engine abuse
+ Track vehicle movement in zones
+ Unauthorized device removal alerts
+ Schedule maintenance

Stay ahead of the curve

Detect engine issues early

Maximize uptime and reduce costs with visibility into active diagnostic faults and critical engine data. Identify and prioritize maintenance tasks early on, before they turn into bigger problems.

Increase fuel efficiency

Save on costs by actively managing fuel use. Monitor and control fuel consumption with at-a-glance trend reports, rules and alerts. Promote fuel-efficient driving and with live, in-vehicle driver feedback or buzzer alerts.

See how your fleet stacks up

Turn your data into a business advantage and deliver measurable results with our fleet benchmarking tools. Discover where you can improve or drive down costs by comparing your fleet to similar fleets.

Streamline operations with Geotab Keyless

Save time and costs with Geotab Keyless – a digital key solution offering secured vehicle access for pooled and shared fleets, even when vehicles are parked out of cellular coverage.
