

The Geotab Small Business Plan

The Geotab Small Business Plan

Geotab GO9

The Geotab GO9 device is the telematics hardware that allows you to manage your business vehicles.

- [Easy to install](#) (link to video)
- Compatible with all makes & models of vehicles including electric vehicles (OBDII port or, for those vehicles without an OBDII port we have adapters/harnesses available)
- Device tampering and/ or removal detection with date-time-location stamp
- Device data memory automatically uploads the last 1.2 minutes upon detection of a collision.
- On-device memory for logging out-of-coverage situations – up to 1 month of driving (80,000 logs)

Supporting your small business - right from the start

From day one as a Geotab User, you have access to a wealth of resources to use at your own pace - continuously updated and available 24x7 including:

- Best practices and pro tips
- Onboarding and self-training assets
- Troubleshooting support
- Geotab Community
- [Support services](#) directly from the MyGeotab Vehicle Management Platform

MyGeotab Vehicle Management Platform

A web-based vehicle management platform to view vehicle and driver activity.

Increase the productivity of your employees and yourself with:

- GPS tracking to understand where your business vehicles are at all times.
- Create rules and exceptions to manage driving behavior and locations.
- Congregation report -- understand where two or more of your business' vehicles are parked together for an extended period of time.
- Locate the closest vehicle to an address.
- ID your driver with NFC (Near Field Communication)

Optimize the use and maintenance of your business vehicles:

- Schedule vehicle maintenance reminders by time, distance, mileage or engine hours.
- Use the Fuel Management Platform to track fuel ups, fuel usage and fuel theft.
- Receive engine status information including; fuel usage, voltage, coolant and temperature.
- Record and interpret vehicle fault data.

Comply with vehicle driving regulations.

- **Geotab Drive** - an app for in-vehicle devices.
- Device tampering detection.
- DVIR (Driver Vehicle Inspection Report)
- IFTA miles recording (International Fuel Tax Agreement) (Canada and USA)
- HOS (Hours of Service) (Canada and USA)
- Personal Mode

Create a safe environment for your drivers and vehicles.

- Set audible alerts for driver coaching including
 - Speeding
 - Idling
 - Harsh braking
 - Driver identification
 - Sharp cornering
 - Over-acceleration
 - Seat belt use
 - Vehicle in reverse

MyGeotab can expand to suit your business' specific needs.

- A selection of map types
- Customizable reporting and dashboards
- Available software and hardware to solve almost any business requirement
