

Fleet productivity

Drive your business forward.

Keep customers happy and control costs with productivity reports and tools.

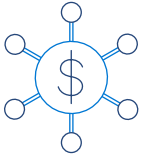

- + Monitor customer visits
- + Confirm arrival and departure times
- + Identify unauthorized stops
- + True trip miles

Get the most from your fleet

Manage downtime

Telematics can help you make the most of your resources. Find out if drivers are using working hours to the fullest with the trips summary report, including mileage, driving time, idling and zone duration. Track arrival and departure times at customer locations.

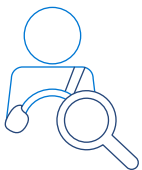

Keep track of your assets

Gain peace of mind with asset tracking and management. Know where all your high valued assets are, including trailers, containers, generators and more. Get deep insight into true asset utilization, dwell time and yard movements.

Optimize routes

Respond quickly to changing conditions. Reduce travel time, miles driven — and save costs — by building the best routes. Geotab seamlessly integrates with a range of advanced route planning solutions, so you can make every mile count.

Track driver behavior

Aggressive driving wastes fuel and causes unnecessary vehicle wear and tear. Set rules for speeding, harsh braking and other unsafe driving to inform coaching and improve driving out on the road.
